Address: 12905 Margit Dr., Austin, TX, 78729

Summary

An interdisciplinary researcher with extensive background in semiconductor devices and instrument construction.

- ⋆ 8+ years' experience in semiconductor device fabrication and characterizations using cleanroom facilities.
- ⋆ Extensive experience in chemical vapor deposition system for thin film and nanomaterial growth.
- ⋆ 5+ year' expertise in scanning probe microscopy for electrical property measurement.
- ⋆ Rich experience in instrument design, construction, programming and troubleshooting.
- ⋆ 4 years' expertise in theoretical model and numerical simulation of nanoscale devices.
- ⋆ Hands-on experience in RF circuit design and testing.
- ⋆ Hands-on experience in machine tools, such as welder, lathe, milling machine, drill press, and planer, *etc*.
- ⋆ Strong commitment to team environment with the ability to work independently.

Experimental Skills

Scanning electron microscopy (SEM), Transmission electron microscopy (TEM), Atomic Force microscopy (AFM), Microwave impedance microscopy (MIM), Energy-dispersive X-ray spectroscopy (EDS), X-ray photoelectron spectroscopy (XPS), Raman spectroscopy, Photolithography, E-beam lithography, Chemical vapor deposition (CVD), Reactive-ion etching (RIE), Metal deposition system, Thermal oxidation, Semiconductor transport measurements, *etc*.

Software Engineering Skills

Python, C/C++, Matlab, Labview, COMSOL, AutoCAD, SolidWorks, Windows and Linux OSes, Graphical User Interface (GUI), Data Visualization, Database (SQL), etc.

Professional Experiences

Research Scientist at University of Texas at Austin — Sep. 2018- present

- ➢ Designed and fabricated MoS_2/WSe_2 van der Waals heterostructure transistors with anti-ambipolar transfer characteristics.
- ➢ Quantitatively imaged the local conductance of the heterostructure transistors by microwave impedance microscopy, and revealed the microscopic origin of novel transport behaviors.
- ➢ Pioneered in imaging intrinsic photoconductivity of two-dimensional semiconductors at nano-scale.
- ➢ Published 2 peer-reviewed papers.

Postdoctoral Fellow at the University of Texas at Austin — Jun. 2013- Aug. 2018

- ➢ **Nano-device fabrication and electrical property measurements on two-dimensional semiconductors**
  - ⋆ Constructed two low-pressure chemical vapor deposition (LPCVD) systems for the growth of two-dimensional semiconductors (MoS_2, WSe_2, black phosphorene, *etc*.).
  - ⋆ Fabricated field effect transistors based on 2D semiconductors with high carrier mobility in clean room.
  - ⋆ Invented memory devices based on MoS_2 monolayers and 2D ferroelectrics (In_2Se_3).
  - ⋆ Quantitatively imaged the potential landscape of working transistors and uncovered the edges states experimentally for the first time by microwave impedance microscopy.
  - ⋆ Designed dozens of photomasks using AutoCAD and L-Edit for device fabrication using photolithography and electron-beam lithography.
  - ⋆ Published 9 peer-reviewed papers.
- ➢ **Scientific instrumentation (Hardware Programming)**

⋆ Developed a Python package which facilitates designing and managing experiments through computer, featuring layered architecture of experiment and OOP instrument control.

⋆ Developed GUI for AFM systems, capable of experiment condition monitoring, automatic data acquisition, full software-based control of all parts.

- **Mathematical modeling and computational solutions**

⋆ Modeled the problem of impedance match in microwave engineering and developed a program for arbitrary microwave circuit optimization with result visualization, now a fundamental and easy-to-use tool in the lab.

⋆ Performed experimental data analysis and image processing such as interpolation/extrapolation, fitting, filtering, noise cancelation through Python modules and customized codes.

- **Environmental health & safety assistant**

⋆ In charge of the lab safety including chemical inventory, recycling and safety training.

- **Teaching experience**

⋆ Lecture Guest for electrical engineering graduate Course EE396V

Research Assistant at Peking University Sep. 2008- Sep. 2013

- **Synthesis and property measurements on carbon nanotube and graphene**

⋆ Developed a chemical vapor deposition (CVD) method to grow single-crystal graphene p-n junctions.

⋆ Built a photocurrent measurement platform for optoelectronic devices.

⋆ Published 11 peer-reviewed papers and applied 2 patent.

- **Teaching experience**

⋆ Supervised groups of 30 students doing analytic chemistry and organic chemistry experiments.

Education

Postdoctoral Fellow in Physics	The **University of Texas at Austin,** Texas, US	Aug., 2018
Ph. D. in Physical Chemistry	**Peking University,** Beijing, China	Jun., 2013
	Dissertation: Preparation of mosaic graphene with p-n junctions and investigation of its optoelectronic properties	
B. S. in Physical Chemistry	**Peking University,** Beijing, China	Jun., 2008

Awards and Honors

⋆ Nano-star Scholarship	Center for Nanochemistry	2012
⋆ Bruker Nano Scholarship	Bruker Corporation	2012
⋆ Zhong Chen Yulan Scholarship	Peking University	2012

Patents

1. Zhongfan Liu, Kai Yan, Di Wu and Hailin Peng, "Growth of single-crystalline graphene p-n junctions in a large scale," Chinese Patent, CN102953118A
2. Zhongfan Liu, Guoming Zhang, Di Wu and Liying Jiao, "**Patterning** carbon nanotube films or arrays by photo-catalytic oxidation," Chinese Patent, Serials NO. 200910092603.8

Conference Presentations (Selected)

1. "Out-of-plane Piezoelectricity and Ferroelectricity in Layered α-In_2Se_3 Nano-flakes," American Physical Society March Meeting, Los Angeles, USA, March 5-9th, **2018**. (Oral)
2. "Nano-imaging of Electrical Properties of $MoSe_2$/WSe_2 Vertical Heterostructures," American Physical Society March Meeting, New Orleans, USA, March 13–17th, **2017**. (Oral)
3. "Uncovering Edge States and Electrical Inhomogeneity in MoS2 Field Effect Transistors," American Physical Society March Meeting, Baltimore, USA, March 14-18th, **2016**. (Oral)
4. "Thickness-Dependent Dielectric Constant of Few-Layer In2Se3 Nanoflakes," American Physical Society March Meeting, San Antonio, USA, March 2-6th, **2015**. (Oral)
5. "Electronic Properties of Photochlorinated Graphene," The 18th China-Japan Bilateral Symposium on Intelligent Electrophotonics Materials and Molecular Electronics (SIEMME' 18), Tianjin, China, Sep.16-18th, **2011**. (Oral)

Scientific Instruments Developed

⋆ Chemical vapor deposition system for growth of two-dimensional layered materials *e.g.*, graphene, MoS_2 and In_2Se_3	University of Texas at Austin
⋆ Transfer system for 2D materials in glove box	University of Texas at Austin
⋆ Tuning-fork based cryogenic microwave impedance microscopy	University of Texas at Austin
⋆ Photocurrent and transport measurement system	Peking University
⋆ Photochemical reaction system	Peking University
